A Real Treat is Coming In "Tons of Money."

Preparations are nearing completion for the presentation of "Tons of Money" on Friday, May 8th, by the local dramatic organization. Scenery and stage settings are being prepared in keeping with the high standard demanded all through this performance, and when the curtain rises on the big night those who attend may rely on a real surprise in every detail of this amateur presentation. The comedy itself is one of the best suited to production locally that could have been chosen, and under the direction of Mr. R. I. Baker the company has whipped into shape rapidly. The music for the occasion has been selected by J. Gee Harper, and the orchestra he has trained will be one of the big features of the occasion. The very modest admission of 50c and 25c should assure the presence of every adult who can possibly get there with the entire family, if there is one.

Following is the cast of characters, in the order of their appearance on the stage:

SPRULES (a Butler).....	Mr. Gordon McLean
SIMPSON (a Parlourmaid).....	Miss Leah Johnson
Mrs. BENITA MULLETT.....	Mrs. J. H. Bastin
LOUISE ALLINGTON.....	Mrs. H. N. Neal
AUBREY HENRY MAITLAND ALLINGTON.....	Mr. B. Franklin Cool
GILES (a Gardener).....	Mr. Eddie Aultman
JAMES CHESTERMAN (a Solicitor).....	Mr. R. D. Farris
JEAN EVERARD.....	Mrs. G. L. Depue
HENERY.....	Mr. J. D. Henderson
GEORGE MAITLAND.....	Mr. Harold Stephenson

O.O.R.P. Celebrate Third Birthday

Now a Battle Of Music

The O.O.R.P. celebrated their third birthday on Friday evening by a bridge party held at the home of Mrs. A. W. Jopling. In spite of the busy season most of the ladies turned out in their usual peppy manner made the evening a very enjoyable one. Heavy refreshments were served during the entertainment of Ladies' Hospital and Children's Hospital. The birthday cake, decorated with rose buds and bearing three birthday candles, which was carried in by little Miss Ruth Jopling. The honor in bridge went to Lady Hammel, while Lady Freeze won consolation. Guest prizes were presented to Lady Grace Harper who has left us to reside in Vulcan and Lady Anna Taylor, who is leaving us for Spokane. Although these ladies are still retaining their membership, they will be missed for their activities in the lodge.

A unique dance will be given in the Community Hall on Friday evening, May 15th, when two orchestras will be present and put on a contest which will be judged by the dancers. Len Davis' Arcadians and Jones' Melody Men of Cardston will be the contestants in this case and as both these orchestras enjoy an outstanding reputation their appearance will be a treat. There will be an evening for dancing completely out of the ordinary. As an opportunity for recreation after sordid operations are practically over this should appeal to the entire country-side. Watch for further announcements in regard to this event.

O.E.S. Card Party Highly Successful

The Home fund committee of the O.E.S. entertained at cards on Wednesday evening of last week at the home of Mrs. A. M. McIver. Honors were won by Mrs. B. Anderson and G. L. Depue, the consolation going to Mrs. G. E. Vaisey and N. McLeod. The financial results were quite satisfactory.

All advertisers are requested to leave copy for ads. at the Chronicle office before Wednesday noon if possible. If too many wait until Thursday morning publication will not be possible at the regular time.

In operation the Wednesday half holiday seems to be more generally observed than usual in past years. It would appear that very few are so busy as to need to work on Wednesday afternoon.

Sam Jopling, accompanied by L. J. Purcell of Calgary, district manager of Investors' Syndicate, was in town for a few days this week. Sam is now employed with this organization and reports business quite active in the line.

Campbell's have the seeds, everything for the garden and don't fail to sow some sugar beet and Pickaninny sweet corn.

THURSDAY, Apr. 30, 1931

NOTES AND COMMENT.

To the layman the evidence given before the Royal Commission inquiring into the desirability or otherwise of a grain futures market would carry but little conviction in any direction. A. J. McPhail, of the Saskatchewan wheat pool, admitted the farmers did not nor could not know whether the futures market was favorable or unfavorable to them. Other witnesses were emphatic without being able to substantiate their assertions in any way. The evidence of A. J. Macaulay, president of the Saskatchewan branch, United Farmers of Canada, is an almost complete illustration of this latter kind of witness, as the following press report would indicate:

Speculation in futures is "criminal" and should be prohibited by law, contended A. J. Macaulay, president of United Farmers of Canada (Saskatchewan section). Claiming he represented a membership of 30,000 farmers in the province, Mr. Macaulay claimed that "agriculture cannot be allowed any longer to exist in the whim of a gambling public."

He quoted figures showing a spread between the price of bread in Canada and a lower price in Britain. But after considerable questioning by Sir Josiah he admitted that the variation might be due to lower costs of distribution, baking or freight rates per loaf in Britain than in Canada.

"Can you explain the connection between the amount of demand in England and the existence of the futures market?" asked Sir Josiah.

Mr. Macaulay sought in vain to explain to Sir Josiah the law of supply and demand which he claimed was ignored by the futures market. The chairman said that the definition prepared by the U.F.C. President bore no resemblance to any definition of the law of supply and demand he had ever seen.

"I was prepared to be very much impressed by the opinion of 30,000 farmers," commented Sir Josiah at the close of the farm leader's testimony, "but I am afraid I cannot be if I cannot understand it."

E. J. Garland, as chairman of the U.F.A. convention was surprised that there was one vote in the convention against investigation of the wheat market, but where was Mr. Garland when the investigation occurred? It is safe to hazard the suggestion that he would have been fully as unprepared and made as foolish a showing as some of the other witnesses who undertook to enlighten the commission.

Whether it continues to be the week or not, the first days of this week furnished some of the finest and most enjoyable weather possible in any country under the sun. Flawless sunshine prevailed with just sufficient breeze to be pleasant. When the weather is good here it is very, very good, but when it is bad it is horrid.

E. J. Garland M.P. describes conditions in this country with what sounds like too much energy, to say the least, but he can lay more claim to truth than the president of the bankers' association when he says loans are being made to farmers in the regular way. What earthly use is there of broadcasting falsehoods where the facts are on hand to contradict the statements made.

From what may be observed from the roads it would appear there will be no reduction in wheat acreage in this district. Many farmers are sowing stubble land as well as summer-fallow. In many instances this is being done to avoid the expense of summerfallowing with very little real cash in hand or in sight. Others believe the stubble crop pays fully as well on the average as summerfallow.

Building Operations Proceed at Churchill

Churchill, on Hudson Bay, Canada's prairie seaport now under construction, is to have its first hotel, or hotels, according to word received by the Canadian National Railways from the department of natural resources of the province of Manitoba. Two hotels and at least one boarding house will be constructed at the port this summer. The big 2,000,000 bushel elevator being built by the Canadian government at Churchill will be completed by next September in time to handle the first test shipments of this year's grain from the prairie provinces to Europe by the Hudson Bay route. While there will be considerable employment at the port this summer, the government, in view of the period of inactivity that will follow next winter, has decided to keep the port town closed another year to avoid possible hardship to settlers.

Calgary Man Wins Slogan Prize

An announcement from Regina over the weekend is to the effect that A. P. Stretton, Calgary, has been awarded the \$500 prize for the best slogan for the World's Grain Exhibition and Conference to be held in Regina, 1932. Over 18,000 entries were received in the contest and they came from all over the continent as well as from many other parts of the world. Mr. Stretton submitted the slogan, "Show what you grow and share what you know," and this was selected as being the most appropriate. Mr. Stretton, who claims English as the land of his birth, farmed for ten years in Ontario before coming to Western Canada to enter the milling business, but for some years now he has been an employee of the Alberta Pacific Grain Company.—Market Examiner.

Overdo Efforts For Progeny

Many an unwise parent works hard, and lives sparingly all his life for the purpose of leaving enough to give his children a start in the world, as it is called. Setting a young man afloat with money left him, by his relatives, is like tying a bladder under the arms of one who cannot swim; ten chances to one he will lose his bladders and go down to the bottom. Teach him to swim and he will not need the bladders. Give your child a good education. See to

it that his morals are pure, his mind cultivated, and his whole nature made subservient to the laws which govern man, and you will have given what will be of more value than the wealth of the Indies. You have given him a start which no misfortune can deprive him of. The earlier you teach him to depend upon his own resources and the blessing of God, the better.—Mentology.

"Hello!" called a feminine voice over the telephone, "is this the humane society?"

"Yes," replied the official in charge. "Well—there's a book agent sitting out here in a tree teasing my dog."

Developments In Transportation (Second Article)

In a previous article under the above heading the fact was emphasized that the motor bus and freight and express truck was offering increasingly serious competition to the steam railways with the inevitable outcome that any reduction in freight rates now so generally demanded by farmers must rely upon the railways to transport their products to market.

The railroads are making some savings every year in the upkeeping of their systems, in additions and betterment to property, rolling stock, etc. For such purposes they expend large sums annually of both current revenues and borrowed capital. As a result they are large employers of labour, the remuneration paid by the Dominion, the Province, and municipalities into tax coffers.

The ability of the railways to finance such expenditures and to continue programmes of improvement in future must always be determined by the public. That fact surely is recognized.

The motor passenger buses and freight and express trucks, on the other hand, are able to keep pace with highways upon which they operate. The public do that by means of taxation. All these buses and trucks contribute is an annual license fee and the regular tax on gasoline. In return the highways are provided and maintained for them. Yet it must be admitted that these heavy vehicles are much more destructive of highways than the common members of ordinary automobiles.

Buses and trucks operate on schedule. Notwithstanding heavy rains, melting snows and frost, they continue to run, and as a result do damage to the highways costing hundreds of dollars to repair—and the people pay the bill. The question may well be asked by the people who pay the bill whether these heavy vehicles are not more destructive of the highways than the railroads which the railways who are called upon to maintain their own highways?

Railways are precluded by law from operating local freight trains on Sundays. But motor trucks are found operating on the highways on Sundays, if not hauling loads of freight or express, at least making Sunday trips to business centres in readiness to start out early Monday morning with a load.

These trucks, too, operating over a fixed route, pick up orders from merchants along the line on their way to wholesale centers and drop over to the wholesale houses on arrival, and then pick up the goods and deliver them along the same route on their return trip. It means a fast service. It is even eliminating the need for commercial travellers. It is a service which the railways cannot supply but it is taking substantial revenues from the railways, and making it more and more difficult for the latter to maintain the services which neither motor buses nor trucks can supply, but which, after all, is still the backbone of the transportation systems of the country.

Already the people are beginning to pay in other ways. Motor truck services are being cut down; daily trains are being kept with twice weekly services; mail delivery reduced to once daily only every other day. Is it to be the transfer of the mail services from the railways to the buses and trucks? Staffs at local railway stations are being reduced to the minimum.

Nevertheless the people, particularly the farmer producers, must continue to depend on the railways, crippled though they be by these losses of revenue for their major services.

What is the solution? Frankly we do not know. As stated in our previous article we are not an apologist for the railways. We hold no brief for them. Rather we are stating what is becoming an increasingly grave question for the people who, in the final analysis, pay the bills either as individuals or as taxpayers.

The gains in service and possibly lower rates on the lighter classes of freight and express over short hauls resulting from these commercial operations over the highways more than compensated for the losses which ultimately the government station in connection with all road haulage traffic had to bear, both light and heavy? That is the problem, not only for the railway management, but for the taxpayers of Canada. In other words, will the gains offset, or counter-balance the losses?

Another question is: Should not these commercial enterprises, motor passenger buses and freight and express trucks, be made subject to a greater measure of governmental control? Should they not be called upon to pay something more than a nominal license fee? And should not the government highways over the principal highways in order to more adequately assist in meeting the cost of maintenance of those highways? Should not a per ton per mile tax be imposed on trucks, or a like charge?

That is, should the taxpayer be asked to pay for the construction and upkeep of these all-weather highways and given what practically free use of these commercial enterprises operating for private profit and in the district will soon approximate to the railways themselves.

He recently announced that the soil is in good condition so far as moisture is concerned, having thirty per cent more reserve than at this time a year ago.

Argentines May Visit Canada

The Canadian delegates who visited South America to attend the British Empire Trade Fair at Buenos Aires, hope that a large body of Argentines will visit Canada during the coming summer. A mutual gathering in Regina of the Canadian Chamber of Commerce during the coming summer, J. H. Woods, of Commerce stated upon his arrival at Montreal.

Felt Tired Out All Day Could Not Sleep at Night

Mrs. Almondson Lalonde, 2481 St. James St., Montreal, Que., writes:—“After a spell of grueling work I was tired out and tired out all day, and could not sleep at night. I was also tired with my art and did not feel like working. I was very ill about Milburn's Heart & Nerve Pills and after taking a few bottles I quickly recovered of my trouble, and can recommend Pill to everyone.”

Bensborough Old Name To British Columbia

Bay Off Johnston Strait Named After Ancient British Family

Bensborough, the name which has been used in Canadian maps since the appointment of the Earl of Bessborough, as Governor-General of Canada, has been known to British Columbia, particularly those who have travelled through the interior route to Alaska for 60 years. This province's association with the name goes back to 1865 according to Henry W. Schloesser, district passenger agent of the Canadian Pacific Railway, Victoria, B.C., historian. In that year Bessborough Bay in Sanderling Channel, off Johnston Strait, which forms part of the inside passage, was so named in honor of the ancient British family.

According to Mr. Schofield, who traced the origin of the name in Capt. John T. Malbran's authoritative “British Columbia Coast Names,” the bay was named after the “Noble House of Bessborough.”

The holder of the title at that time the reference states, was John Bonham Ponsonby, fifth Earl of Bessborough and Edward Dundas. His nephew, Edward Ponsonby, was a midshipman in the Royal Navy, serving then on the B.C. coast.

“THESE HARD TIMES”

“The hard times and scarcity of money makes it more important than ever to economize. Once I saw a woman who had a very small sum of faded or out-of-style dresses, coats, stockings, and underwear. For drying, she used Diamond Dyes. They are the most economical dyes in the world because they last longer and make you proud. Why, things look better than new when redyed with Diamond Dyes. You can't afford to waste streak, or run. They go on smoothly and evenly, when in the hands of a dyer, Diamond Dyes never take the life out of cloth or leave it limp as old dyed clothes. Diamond Dyes can be called ‘the world's finest dyes.’”

S. B. G. Quebec

Amendments To Coast Shipping Laws Urged

More Canadian Boats Should Carry Grain To Market Is Suggested

Important ships of Canadian boats urged upon the government by the Dominion Marine Association. It was proposed that Canadian boats be given a larger share of export grain from the lakehead to continental ports. At present it is permissible for Canadian grain to be carried by United States boats to Buffalo and other American ports, and by Canadian boats and forwarded to Montreal.

The association desired the government to expand the use of Canadian boats to English and from there to Montreal. This would apply only to Canadian grain destined for export.

Rise Of Livestock Industry

One-Fourth Of Canadian Population Supplied By Meat Industry In Winnipeg

The rise of the livestock industry to a parity with that of wheat and flour in Western Canada is being considered by the government.

It is pointed out that one-half of Canada's population is supplied by the meat industry in Winnipeg, which ships beef, pork, veal, lamb, and mutton to every corner of the world. Winnipeg stockyards handled 1,800,000 cattle, hogs, sheep, and lambs in 1930. A turnover of \$20,000,000 represented the business of two of the city's largest packing plants.

Canadian Cars Tripled

Average Is Now One Car To Every Eight Persons

Automobile ownership in Canada has tripled since 1920, according to a bulletin from the Canadian Automobile Association. There were 1,220,000 motor cars registered in the Dominion in comparison with only 407,000 in 1920.

The automobile is the United States in the per capita ownership of automobiles. The Dominion's average is one car to every eight persons, whereas that of the United States is one automobile to every 4.6.

From Action—Who can describe the complete relief and comfort which follows the application of Dr. J. Kellogg's Asthma Remedy?

Who can describe the great relief which follows when its soft and gentle influence relieves the tightened, choked-up throat of asthma? A valuable influence a thing of the past for thousands. It never fails. Good druggists

everywhere have sold it for years.

Explorers In Education

English Headresses Heads Delegation To Investigate System In Canada

Under the leadership of Dame Muriel Talbot, a party of 12 British headresses of girls' schools in the Old Country, have arrived here.

“We are exploring in the real sense of the term,” said Dame Muriel Talbot in an interview before she left the “Duchess of Bedford.” “We are going to see the educational system as far as it relates to girls in Canada, so that we can advise parents on the wisdom of sending their girls to Canada to complete their education.”

“Nowadays, the girl going to school thinks of the future and maps out a career for herself. There is no more scope in the Old Country and this is why we are interested in Canada, where we must around for some other country where she can earn a living.”

“Canada is a young country and headresses of girls' schools have been brought up to a high standard and therefore we are also here in the capacity of learners.”

“If a girl is coming to Canada to earn a living there she should fit into it for that purpose by completing her education here on the ground.”

“For that reason we wish to see what the universities are like here, what the cost of living is, what the cost of food is, what the cost of accommodation, vacations and also to study the educational standards. In this manner we shall be able to advise parents on the subject.”

Will Visit Battle Zones

Brigadier-General Hughes To Inspect Work On Canadian Memorials

Brig.-General H. T. Hughes, C.M.G., R.C.A., head of the Canadian Battle Memorials Commission, is going to France and Belgium and the Netherlands in connection with the Vimy memorial. He will be away for several months. “The Vimy Memorial will be completed in two years,” said General Hughes, who was asked as to the progress made.

“Seven memorials, at St. Julian, Paschendaele, and Sanctuary Wood, Belgium and at Courtney Ridge, Boulogne Wood, and La Targette in France, have already been handed over to the Imperial War Graves Commission. Each stands in a miniature park, and 220 acres were donated to the French government for the Vimy memorial.”

Planning a coast-to-coast motor trip, E. Wharton Shaw and V. E. Steers shortly will make tests of their steaming boat, the "Saskatchewan," starting from the Gulf of California, N.S., in an attempt to win the medal offered by the Canadian Highway Association of Victoria, B.C.

Wheat exports from Vancouver, the second crop to February 1, amounted to 45,031,072 bushels, according to the figures of the Vancouver Merchants' Exchange. This total compares with 25,885,856 bushels for the corresponding period of last year.

Board Is Abolished

Soldier Settlement Board To Be Replaced by a Director Of Soldier Settlement

Abolition of the Soldier Settlement Board and its replacement by a director of soldier settlement has been decided upon by the Minister of National Defence and Efficiency, Hon. W. A. Gort, Minister of Immigration, stated. Mr. Gordon was asked the reason behind a resolution appearing upon the order paper of the House of Commons for abolition of the board.

The minister said that there was now no necessity for a board of three commissioners to deal with the work of the organization. He was not in a position to say who would be appointed to the post of director of soldier settlement.

Agricultural Credit Corporation

Three Million Dollar Corporation Will Function In Near Future

Agricultural Credit Corporation of Canada, Limited, which will aid primitive farmers to go into mixed farming, has been organized with a capital amounting to some \$3,000,000 and will "function at a not distant date."

This was the information given John McAllister, Ltd., South Battleford, to the House of Commons by Premier Bennett.

Mr. Bennett made it plain that the corporation was created by private and not through government action.

Information he gave Mr. Valentine, said the proposal had been given him verbally recently.

The age of the permitted trees in the permitted forest of Arizona is estimated at about 200 million years.

The Common Cold

Four Simple Rules That Will Assist In Avoiding This Disease

By John Burke Ingram

When you catch a cold from another person you do so because germs from his nose or throat have been thrown out by a cough or a sneeze and have found a way into yours. If everyone would remember to be very careful to cough or sneeze into a handkerchief when suffering from a cold there would be a rapid decline in the incidence of colds.

But it is possible through one's neglect and stupidity to develop a cold quite spontaneously. Going around with wet feet instead of taking the slight trouble of drying them, running out of a warm house or office into a cold damp raw spring day are illustrations of two common causes of the too-common cold.

Do not make the mistake of thinking little of the common cold. It keeps more people away from work all the time, than any other disease, and it very often develops into something that can cause heart disease, rheumatism, nose, throat and sinus trouble, deafness and last but by no means least, pneumonia which I should mention shortly.

Now, here are a few simple rules. First, always sleep with your window open. If you get used to fresh air, even cold air, you will be less likely to catch a cold if you happen to encounter it, a bit suddenly when leaving warm buildings. Many people have the mistaken notion that the best way to avoid a cold is to stay in a cold room, wear heavy clothes and to expose the body to thick heavy clothes. On the contrary, is one of the best ways of catching a cold. One should carry a love of fresh air, a love of exercise, a love of health of sleeping with open windows. One should exercise as much as possible in the fresh air in daytime. And as to clothing, it is better to have to take off a coat than to have to leave a warm garment, no matter how short a time, than to rely upon thick woolens. Protection against sudden changes of temperature, not necessarily clothing, is the best protection of the organism.

The less likelihood there is that you will develop a cold, the less you will need to go to a physician when you do. If you have a warm garment, no matter how short a time, than to rely upon thick woolens. Protection against sudden changes of temperature, not necessarily clothing, is the best protection of the organism.

Explanations and Comments

Call of Zechariah versus Job

It was on His way to Jerusalem that Jesus met Zacchaeus, the chief publican—a commissioner of tax collectors, which might call him. This office of chief publican was usually held by a man who was not very often of publicans were given to Jesus. Zacchaeus must have been a shrewd man, for he had gained this office. Love of gain had made him a publican, and as chief collector he had a good fortune at the expense of his brethren.

Zacchaeus had learned that Jesus was coming to Jericho, so he had planned to see Him, despite his bad record as a tax collector.

He had heard of Jesus as the friend of publicans and sinners, no doubt the better the condition that you are in, the less likelihood there is that you will develop a cold. One should exercise as much as possible in the fresh air in daytime. And as to clothing, it is better to have to take off a coat than to have to leave a warm garment, no matter how short a time, than to rely upon thick woolens. Protection against sudden changes of temperature, not necessarily clothing, is the best protection of the organism.

Zacchaeus was determined, and he was resourceful. He ran on ahead of the crowd and climbed up into a sycamore tree—figuratively with a leaf like the mulberry tree, and a very tall tree, with many horizontal branches. From this point of vantage he could not fail to see Jesus as He passed by.

Zacchaeus was determined, and he was resourceful. He ran on ahead of the crowd and climbed up into a sycamore tree—figuratively with a leaf like the mulberry tree, and a very tall tree, with many horizontal branches. From this point of vantage he could not fail to see Jesus as He passed by.

BENNETT MAY REDUCE THE SIZE OF HIS CABINET

Ottawa, Ont.—Establishment of a new department of communications in the Dominion government has no jurisdiction over air services, railways, canals, wireless and other matters is contemplated by the government, Premier R. B. Bennett told the House of Commons.

"Is there an office?" some members interjected.

"Yes, and post office," the prime minister replied.

A government has also been given some consideration to reducing the size of the cabinet by consolidating some of the existing departments, but so far has not been able to decide whether this step would result in an improvement in service.

Mr. Bennett made his statement

recently when the House was con-

sidering a resolution to increase the salary of the solicitor-general from \$2,000 to \$1,000 per year.

It was sponsored by Hon. Hugh Cuthie, Minister of Justice, who ex-

plained that since 1927 the solicitor-

general had been receiving \$10,000

through a statutory vote. It was not

thought necessary to increase it by an amendment to the Salaries Act.

No objection to the measure was

offered by Rt. Hon. W. L. Mackenzie King, Liberal leader, but he said

it might be a good time to reduce

the number of portfolios in the gov-

ernment. He complimented Premier

Bennett on his success in reducing ex-

penditure in other directions.

"The government will agree," he said. "That a small cabinet, particularly one headed by him-
self, would be quite as efficient as a larger one. He seems to be getting on very well without much help from his ministers."

The transfer of the natural re-

sources to the western provinces

might lead to some consolidations,

which would be a good time to re-

duce the number of portfolios in the

government," he said. "I do not say

whether a portfolio would give

more power to the minister concerned,"

he continued to reflect.

The prime minister continued

that Mr. King had attempted to re-

duce the amount of portfolios in the

government but had failed in in-

creasing them owing to the creation

of a separate role of fisheries, as a

result of the Dungeness case.

He seemed to feel that it was not

the intention of the government to

reduce the number of portfolios in the

prime minister permanently, although it had

made some savings.

"I think we might very well have

a separate ministry of communications,"

said the premier. "There are such

things as air services, railways and

wireless which could well be handled

separately."

"I may also say that the govern-

ment hopes to introduce a bill

which will make more efficient our

control over revenues and expendi-

tures."

He pointed to the great increased

in the amount of money handled by

the Dominion Government since the

beginning of the century.

"I am extent to which cannot

control the amount of money handled

by the government, but I am not prepared to say," Mr. Bennett went on, "because in a country as large as this it is difficult to keep in touch with conditions in all parts, and it might not be well to expand too much detail on the individual minister."

May Visit Canada

Miss Tolstoy May Enter Dominion II
She Couples With Laws

Ottawa, Ont.—Miss Alexandra Tolstoy, daughter of Maximilian writer, will be invited to visit Canada if she complies with Canadian laws, it was stated in the House of Commons by Hon. W. A. Gordon, minister of immigration.

Mr. Woodsworth (Labour, Winnipeg North Centre), drew the minister's attention to a statement appear- ing in the press that Miss Tolstoy had been prohibited entry into this country.

Recognize Spanish Republic

London, England.—Rt. Hon. Arthur Henderson, secretary for foreign affairs, announced yesterday that he recog-

nized that all the Dominion governments had fully concurred in the decision to officially recognize the new republican government of Spain.

Reorganization Plan Means Many Changes

Western Officers Of Soldiers Settlement Board May Be Amalgamated Ottawa, Ont.—Amalgamation of western offices, early retirement of certain officers and other changes in these results will follow from the reorganization of the Soldiers' Settlement Board, which was announced by Hon. Wesley Gordon, Minister of Immigration, at Regina, last night. Prince Albert will be closed down, and the work of the board will be concentrated at Saskatoon.

The board at Ottawa, consisting of three men, Col. J. G. Ratney, of Manitoba, is to be abolished, and the work done by one man to be appointed instead of three.

This plan of reorganization seems to have been worked out by Mr. McGlade, of northern Ontario. Mr. McGlade, said to be a close political associate of Hon. Gordon, was appointed some time ago to make an investigation of the department. He was paid, it is said, \$2,000 plus expenses. He had had some experience in farm problems, having been associated with the Massey-Harris Company. He has made an exhaustive survey of the department, visiting all the offices from Ottawa to Vancouver, and his recommendations are now being implemented.

New School Readers

New Readers For Western Province To Be Introduced Shortly

Edmonton, Alberta.—An inter-provincial committee of educationalists has met in Edmonton to draw up a code of school readers for the western prairies. It is to be a series of books for children aged 6 to 12 years.

The committee, which included Dr. John T. Ross, deputy minister of education, the other committee men were, Dr. S. J. Willis, superintendent of education, Mr. E. C. McPhail, of the Co-operative Sales Committee, and Mr. Fletcher, deputy minister of mines and labour.

A lone among the 52 witnesses who

testified at eight sessions in three prairie cities, Mr. McPhail represented the publishers of the Canadian Wheat Crop.

He said the publishers had agreed to

make the new readers available to

schools at a price of 15 cents each.

The new readers will be ready for introduction in the fall of 1932.

Urge Postal Reforms

Suggestions To Speed Up Mail Service Passed By Manitoba Association

Winnipeg, Man.—Two suggestions to speed up mail service were contained in resolutions passed by the Manitoba Postmasters' Association, in annual convention here.

The first request that size of "open envelope" be restricted to six inches square, it was explained, held that in many instances letters were lost or delayed through use of large envelopes.

The second seeks to eliminate the large fine of \$100 for a single letter if it is delayed.

Both requests, it was claimed, if adopted, would result in a saving of time.

Failure of the farmers market to assume "anything like the risk-taking function so commonly attributed to it," was named as a "damaging contribution" to the present low prices.

Mr. Spencer, who spoke, blamed the 1930 debacle, were hesitant to come into the market now, with the result that necessary buying to absorb "hedging" sales was not present, price-recessions following.

Mr. Spencer was informed that the cost of deposing these people was \$13,220.

P. H. Nelson, Russell, Man., was elected president.

BRITISH FLIER SETS NEW RECORD

Governor-General Receives Gold Key To Regal Hotel Room

To Regal Hotel Room—On Friday evening the Governor-General visited the quarters of the Governor-General's Foot Guards, of which he is honorary colonel, and was presented with a gold key to the room in the hotel.

In brief speech of thanks Lieut.-Col. J. C. Foy, V.C., commanding officer of the crack unit, expressed the pleasure of the gathering of officers and medical guards of the Household Cavalry's visit.

In his reply, the Earl of Beaconsfield took occasion to congratulate the regiment on the showing of the guard of honor by which he was received in the capital.

Unveiled Remembrance Stone

Ottawa, Ont.—On April 23, His Excellency the Governor-General, over the long distance telephone, unveiled a stone plaque in memory of the late Michael Faraday, whereupon echo-linking discovery led to the birth of the electrical industry. The Earl of Beaconsfield is a former director of London Power Company.

Sets New Aviation Mark

British Award For Canadian

Heston, England.—Flying the same little red plane in which he shattered Colonel Lindbergh's speed record for a trans-continental flight in the United States, Captain Glen Kidston, of Hawick, set a new aviation mark for European pilots to shoot at, even though the task was not to accomplish the task he had set himself.

Leaving London at 8:30 a.m., he arrived in Rome 5 hours and 20 minutes later, but on the return flight he was forced down in France by lack of fuel and could not complete the round trip.

SAYS FARMERS ARE OPPOSED TO FUTURE TRADING

Winnipeg, Man.—The curtain was drawn down on the public hearings before Sir Josiah Stamp's Royal Commission on agriculture, which began in Ottawa, Ont., last week, and now continues in the Canadian West. Pauline made a dramatic last minute dash into the spotlight with a plea for governmental supervision of futures trading. At its last session in Canada, the Royal Commission heard the views of the Pool, members of the Pool Central Selling Agency, and Andrew Cairns, pool statistician.

Along among the 52 witnesses who testified at eight sessions in three prairie cities, Mr. McPhail represented the Canadian Wheat Crop, while Col. J. G. Ratney, of the Canadian Wheat Crop, was the chief witness.

They are "opposed to futures trading," he said, "as a means of stabilizing the wheat crop."

The department of agriculture has been asked to consider a proposal to prohibit futures trading in wheat, and the Royal Commission has agreed to do so.

The government is urged to propose that the department be allowed to prohibit futures trading in wheat, and the Royal Commission has agreed to do so.

The department of immigration has been asked to provide good cause for the deportation questioned in the British House.

No. 19

PUBLISHED IN THE INTERESTS OF THE PEOPLE OF CHAMPION AND FARMERS OF THE VILLAGE.
GEO. L. DEPUE, Editor

Fred: I can't remember the words of that new song.

Jim: That makes me wonder, will you have to do is to make us happy.

The broad angle at which the disks on the Mc-Dug harrow plow work results in cutting clean alluvial soil.

It is a good implement for sowing seed.

It only kills all the weeds but keeps the surface well matched.

For the grass grows where his feet fall.

every year, the harrow plow is a double purpose implement.

It is so good that a double harrow that the two implements cannot be considered in the same class.

From the standpoint of the work which it does, the har-

row-plow is really a shallow-working, narrow-furrow multiple disk harrow. The spacing of the disks is 8 inches and they broaden to a greater angle to produce a deeper, finer seed bed than can be obtained with a single disk harrow.

From the standpoint of power requirements, the harrow plow as compared with the plow requires less power per foot of cut.

Bill Moore, our local hardware man, has a model in front of the mirror yesterday before he realized what he was doing he had sold him three sets of hair tonic and short changed himself at the dinner table.

"Laughter cures appetite," said the Scotchman, staring at cry at the dinner table.

In order to jingle coins in your pocket you've got to shake a leg.

A man cannot afford to be lenient with himself, though he be lenient with others.

"Laughter cures appetite," said the Scotchman, staring at cry at the dinner table.

To meet the demand of

of Mr. Mc-Dug's

ton was

vides a full load for the

power developed. This

"Good Equipment Makes a Good Farmer Better."

Local and General

It is much easier to be critical than to be correct.—Disraeli.

Yellow Newton Apples, crate style, \$1.75 box at Campbell's.

Remember Blussen's bake sale and tea Saturday May 9th, in old drug store.

Mrs. G. T. Dow, who has been seriously ill for some time, is now improving steadily.

Bingo Gopher Poison at 75¢ a tin makes eight quarts of poison—at the Drug Store.

Mr. and Mrs. F. J. Clapp motored to Calgary, where the latter remained to visit for a week.

Come to church on Mother's Day May 10th. It will be a service of joy and thanks giving.

The storm sash were removed from the Savoy hotel this week. It should be time to be able to trust the weather.

G. M. Campbell will sing at Barons on Sunday night when the Elks Lodge there, will hold a Mother's Day program.

H. Frame of Brant was a visitor in town on Saturday and on his return home was accompanied by M. F. Hamilton.

A special Mother's Day offering is asked for on May 10th. A cent for each year mother has lived. Use the large envelope.

R. C. Crane had 1,000 acres of wheat sown last Friday night and by this time must be nearing his objective for the season, 1,800 acres.

"In times of depression and quietness of trade, I used to prepare for the better times, which never failed to come."—Andrew Carnegie.

Mr. and Mrs. G. A. Manhard left for Blackfalds on Saturday, on receipt of the news of the serious illness of their daughter, Mrs. Stevenson.

The forests of Canada are, in the aggregate, the second most important natural resource, being exceeded in actual value of products by agriculture alone.

K. R. McLean, R.O., of McLean & Anderson, Sights Specialist 224-8th Ave West, Calgary will make his monthly visit to Champion Friday, May 1st, at the Drug Store.

As Billy Jones and Ernie Hare remarked, "Prosperity is like parking spaces—plenty for those who get there first."

from hatching this spring. Deep ploughing may destroy a few of them, but this is very uncertain. In all fields in which the moths laid many eggs last fall cutworms will be present in destructive numbers this spring and summer.

A new system of raising ditches has been adopted by the present government. The doubtful value of imported goods is raised while the rate remains the same. Why the camouflage?

ALBERTA

Mrs. W. A. McIntyre spent the week in Lethbridge.

Now cleaning up the balance of our ladies silk hose, 49c pair at Campbell's.

Leo Taylor's auction sale on Saturday night was a decided success the bulk of the offerings being sold at good prices. A Hopkins was the auctioneer.

Well sell the finest old country Strachan Let us have your order now, while the stock is fresh.—Champion Drug Store.

Lost—Pair of spectacles in black case. Finder please return to E. Cemolini, Savoy Hotel.

Don't forget mother next Sunday Campbell's have a lovely selection of plants at 89¢ each.

Seeding Making Rapid Progress

Seeding operations have made exceptionally rapid progress this week. Underneath warm, at times for horses' comfort, the weather has been perfect, the absence of high winds being particularly noticeable. Lack of sufficient moisture has curtailed the growth of grass, but even under adverse conditions the country is taking on a shade of green wherever any seed is left. Summerfall is reported to be in good condition for seedling all over the district, although reserve moisture is lacking, and the grain should make a good start as early as now grain is already sprouted.

The Pale Western Cutworm

(University of Alberta Note)
Appearance—Color slatey grey. No markings on body. Area where damage is almost certain to occur. Nearly all of the province to the south and east of Stettler, particularly along the Red Deer River and the Goose Lake railroad line. No trouble from this cutworm is anticipated to the north or west of Stettler, or in the western half of Southern Alberta. Crops most susceptible to attack. All grain crops. Broad leaved plants, such as garden produce, clovers, etc., are not eaten very freely by this cutworm. Control—Practically nothing can be done to prevent all of the eggs that were laid last fall

from hatching this spring. Deep ploughing may destroy a few of them, but this is very uncertain. In all fields in which the moths laid many eggs last fall cutworms will be present in destructive numbers this spring and summer.

Strayed

From the premises of Mrs. Bertha Anderson, Secy. 28-14-23, about April 15th, black Holstein cow, branded "E".
On right shoulder Sustainable reward for information leading to recovery. Phone 1204, Champion.
